

Portfolio & Analytics Review

Credit Card Transactions and Customers: Key Insights

Key findings across card categories, quarterly spend patterns, and demographic revenue drivers

Executive Summary · 2026

Made with GAMMA

From SQL Server to Power BI: how the analysis was built

01 SQL Extraction & Staging

Transaction records and customer profiles extracted and verified inside Microsoft SQL Server.

02 DAX Segmentation & Metrics

Calculated WoW % velocity, synthesized the core Revenue column, and structured Age and Income segments.

03 Two Reporting Views

Dedicated dashboard pages isolating transaction mechanics on one canvas and customer demographics on the second.

Architecture: MS SQL Server · DAX modeling · Power BI service

Made with GAMMA

Blue cards generate 83% of revenue

TIER CONCENTRATION

83%

Blue produces 46.1M of the 55M portfolio total.

Premium tiers represent less than 17% combined, highlighting a massive runway to upsell eligible Blue holders into Silver and Gold.

Revenue is steady, then dips in Q4

QUARTERLY TREND

14.2M

Q3 peaked with 166.6K transactions before falling to 13.3M (161.6K) in Q4.

Weekly revenue oscillates between 0.5M and 0.65M, tracked via the WoW % measure to isolate anomalous drops.

Ages 40 to 60 are the revenue core

01

Under 30

Emerging base. Minimal baseline revenue; lower spending power and credit limits.

02

Age 40–50

~25M Revenue. The single largest age segment in the portfolio, driving prime household expenditures.

03

Age 50–60

~19M Revenue. The second pillar of profitability, characterized by mature earnings and stable card loyalty.

04

Over 60

Tapering spend. Reduced transaction frequency and conservative post-career balances.

High-income customers deliver over half of revenue

HIGH INCOME SEGMENT

~29M

More than 52% of total revenue

Built from the DAX Income Segment tier; represents top credit card utilization and retention value.

53%

portfolio share from high income

MEDIUM & LOW SEGMENTS

~26M

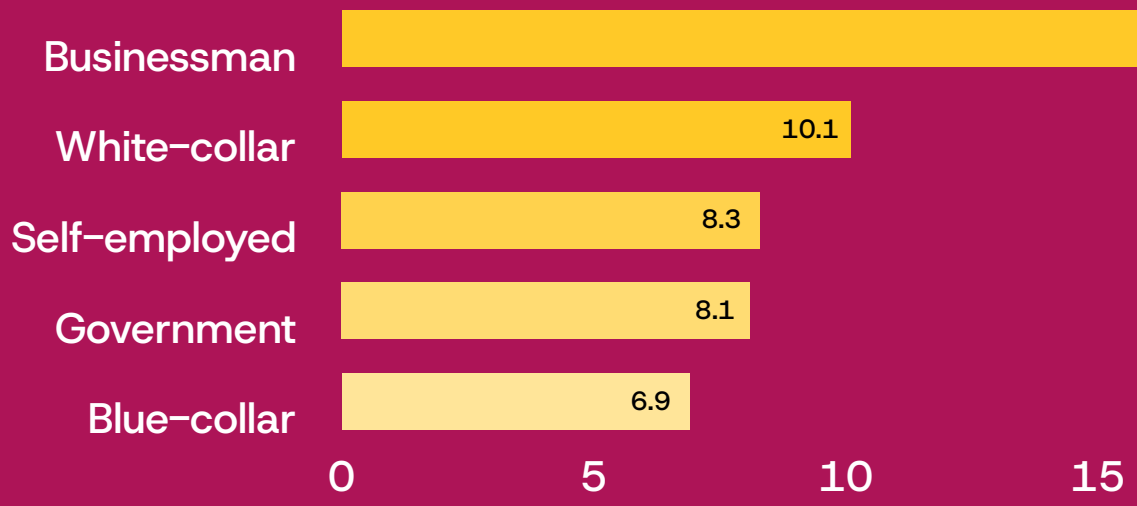

combined balance

Medium income yields ~16M; Low income contributes ~10M, providing steady transactional volume.
